P.V. INTERNATIONAL

SALES TERMS AND CONDITIONS

- **ORDERS:**

All orders must be submitted in writing (e-mail, fax or through our sales representative). No cancellations or changes to orders that have already entered production will be accepted.

- **RATES:**

This pricelist cancels all previous ones. Prices are subject to possible variations due to changes in prices of raw materials, market situations, etc.

IMPORTANT NOTE

- We want to inform our clients that some colors in this catalog have changed from previous catalogs. If you are ordering panels to carry on with an old and/or on-going project requested from our previous catalog, please let us know in order to send the same color. Not all corner pieces are ready available due to our production processes. Please request an estimated time for production while ordering
- All measurements, weight and panel's area are approximate (not exact) due to expansion and contraction of the panels during the production process. INDUSTRIAS JIMAN SL will take not responsibilities for any claims on the above.
- INDUSTRIAS JIMAN SL in order to keep improving and updating its reserves the right to make any modification at any time, in shape, color, size, format or price of its entire product range PANELSTONE / PANEL PIEDRA.
- INDUSTRIAS JIMAN SL informs that all photographs included in the catalog have been taken in real projects and in a studio before printed onto a paper, therefore, the light and color of the panels may be affected by these factors
- INDUSTRIAS JIMAN SL informs that all photographs included in the catalog have been taken in real projects and in a studio before printed onto a paper, therefore, the light and color of the panels may be affected by these factors

SEGURIDAD_ 138 - 139

PANEL PR

PANEL HD

SECURITY

It's a dovetail panel system like a puzzle suitable for Inside and outside wall's coverings:

Composition of the Panel:

First Layer:

It's a layer of 3-5 millimeters of concrete polymer in a base of stone called "STONE" composed of a mix of 15% of resin with their appropriate catalyst and the 85 % of arids (calcium carbonate, dolomites, silicates, alumines, melanins and fire-resistant additives)

Second Layer:

The second Layer is composed of an injection of polyurethane foam with opened cell that provides to the panel a very good thermic and acoustic insulation. Called "Polyurethane"

Panels are in great demand by Architects, Decorators, Designers, Promoters, DYS centers, Decoration Shops...

INSIDE INSTALLATION:

All kind of building: Houses, shops, restaurants, hotels, chain stores, Showrooms, Halls, Offices etc.,

OUTSIDE INSTALLATION:

All kind of building: Facades, terraces

ADVANTAJES

Gran Calidad: One of Stone Panel ® Panel Stone ® key properties is its high quality (re :textures,colors, strength). This combined with the creativity of our designers and innovations of our engineers allow us to differentiate us in the marketplace and be one of the most competitive panel manufacturers worldwide.

Installation: It is quick and easy. Due to the panels size (1 Sqm) and lightweight panels are easy to handle. It requires just one person to install them. It doesn't require professional labor for installation (See installation instructions)

Perfect Finish: Its composition (stone + polyurethane) together with the paint used (iron oxides), makes a perfect texture and high quality finish over time.

Good thermal and acoustic insulation: Panel piedra ® panels are made with polyurethane injection with open cell (This material, "polyurethane" is one of the best acoustic and thermal insulators that exists in the market.

Maintenance: No maintenance required. Panels' composition does not allow the generation of moisture and/or bacteria.

Transportation: Lightweight panel (6-7 Kg) and panels' size makes the product easy to transport. It does not require a special vehicle.

Density

Saline Resistance to the fog	Sodium Clorudo Water	Temperature	2000 hours
	5,0 ± 0,5%	35° / -2	OK
Camara Resistance Accelerated	Ultraviolet Light	2000 hours	No hay caleado
	Temp. +50° / 3°		No loss of gloss

Screwdriver with different tips for screws
 Electric saw with wood cutting blade (a radial arm saw is recommended for professionals)
 Cartridge Gun, Tape measure, Ruler, Paintbrush, brush for putty texturing, 3mm and 8 mm bits, Wall plugs & screws, Electric nail gun, Filler Putty (indoor), Expsy putty (outdoor installation), Paint & aged spray

Measure the surface to be covered and calculate how many panels will be needed. Each one is approx. one square meter.

Use a ruler and a marker and draw a line along the surface to be cut.

For jagged panels, start cutting one end along the line you have drawn

Check panels are properly cut.

Place the panel on the wall and use the 3mm bit to drill through the joints across the panel till you get to mark the wall where wall plugs will be fixed later.

Place the panel on the wall and use the 3mm bit to drill through the joints across the panel till you get to mark the wall where wall plugs will be fixed later.

Remove the panel and drill with the 8mm bit where the wall has been previously marked with the 3mm bits

Stick all wallplugs

WE WILL APPLY A FEW VERTICAL LINES OF GLUE ON THE BACK OF THE PANEL. THIS IS VERY IMPORTANT FOR PANELS INSTALLED OUTDOORS

We will apply a few vertical lines of glue on the back of the panel. This is very important for panels installed outdoors

Assemble all panels one after the other

Keep repeating the action systematically until the wall is all covered, always bearing in mind to insert screws in easy to hide areas..

Once the surface is all covered with panels fill in assembly joints and drilled holes with the putty.

Then texture joints using a wet thin paint-brush

Once all joints are textured wait 2 to 4 hours before the next step

When the putty is dried paint the joints where putty was previously applied using different brushes

The spray is used to balance colours between joints and panels. So once the paint is dry spray over the joints one flash at a 40cm distance

Right after when the paint is still wet rub a wet clothe over the joints to cover the pores. Do it as many times as needed.

Once all process is finished the result should be perfect

Important Notes

- Once panels are cut we suggest using a grinder to get a fast and fine result, or to use a radial saw to cut them instead
- For a quick fixing (professional) it's also suggested to use a pneumatic nailer instead of screws.
- It is important to let the paint and mastics dry the suitable time. When applying aged paints make sure to do it at the right distance (40 cms) from the panel and always with a quick flash and rubbing right after with a damp clothe

It's a dovetail panel system like a puzzle suitable for Inside and outside wall's coverings:

Composition of the Panel:

It's a layer of concrete polymer in a base of stone called "STONE" composed of a mix of 15% of resin with their appropriate catalyst and the 85 % of arids (calcium carbonate, dolomites, silicates, alumines, melanins and fire-resistant additives)

Panels are in great demand by Architects, Decorators, Designers, Promoters, DYS centers, Decoration Shops...

INSIDE INSTALLATION:

All kind of building: Houses , shops, restaurants, hotels, chain stores, Showrooms, Halls, Offices etc.,,

OUTSIDE INSTALLATION:

All kind of building: Facades, terraces

ADVANTAJES

Great Quality: One of Stone Panel ®- Panel Stone ® key properties is its high quality (re :textures, colors, strength). This combined with the creativity of our designers and innovations of our engineers allow us to differentiate us in the marketplace and be one of the most competitive panel manufacturers worldwide.

Installation: It is quick and easy. Due to the panels size (0.80 - 1.00 Sqm) and lightweight panels are easy to handle. It requires just one person to install them. It doesn't require professional labor for installation(See installation instructions)

Perfect Finish: Its composition (stone) together with the paint used (iron oxides), makes a perfect texture and high quality finish over time.

Great Resistance: Great Resistance: This Product was created with an innovative composition (by mixing arid aggregates) that makes a high impact panel, fire and all weather resistance. These properties allows the panel to be widely used in public places such as hotels, museums and places with high public transit.

Maintenance: No maintenance required. Panels' composition does not allow the generation of moisture and/or bacteria.

Transportation: El poco peso del panel (15-20 Kg.,) su formato de 0,85 - 1,00 de m2 (aprox) son cualidades que hace su facilidad en el transporte no siendo necesario un vehículo especial.

Screwdriver with different tips for screws
 Electric saw with wood cutting blade (a radial arm saw is recommended for professionals)
 Cartridge Gun, Tape measure, Ruler, Paintbrush, brush for putty texturing, 3mm and 8 mm bits, Wall plugs & screws, Electric nail gun, Filler Putty (indoor), Exposed putty (outdoor installation), Paint & aged spray

Measure the surface to be covered and calculate how many panels will be needed. Each one is approx. one square meter.

Use a ruler and a marker and draw a line along the surface to be cut.

For jagged panels, start cutting one end along the line you have drawn

Check panels are properly cut.

Place the panel on the wall and use the 3mm bit to drill through the joints across the panel till you get to mark the wall where wall plugs will be fixed later.

It's recommended to drill in areas easy to hide. Repeat the action 4 to 6 times per panel.

Remove the panel and drill with the 8mm bit where the wall has been previously marked with the 3mm bits

Stick all wallplugs

We will apply a few vertical lines of glue on the back of the panel. This is very important for panels installed outdoors

Place the panel on the wall and insert screws in the holes 2-3mm into the panel so we can then hide them with the putty

Assemble all panels one after the other

Keep repeating the action systematically until the wall is all covered, always bearing in mind to insert screws in easy to hide areas.

Once the surface is all covered with panels fill in assembly joints and drilled holes with the putty.

Then texture joints using a wet thin paintbrush

Once all joints are textured wait 2 to 4 hours before the next step

When the putty is dried paint the joints where putty was previously applied using different brushes

The spray is used to balance colours between joints and panels. So once the paint is dry spray over the joints one flash at a 40cm distance

Right after when the paint is still wet rub a wet cloth over the joints to cover the pores. Do it as many times as needed

Once all process is finished the result should be perfect

Important Notes:

- Once panels are cut we suggest using a grinder to get a fast and fine result, or to use a radial saw to cut them instead
- For a quick fixing (professional) it's also suggested to use a pneumatic nailer instead of screws.
- It is important to let the paint and mastics dry the suitable time. When applying aged paints make sure to do it at the right distance (40 cms) from the panel and always with a quick flash and rubbing right after with a damp cloth.

About the Product**Cleaning and maintenance of the Panel:**

The best product for cleaning panels is water. Cleaning with water allows us to remove any dust from the product.

In case you have the need to disinfect any area, use neutral pH soap.

Do not use harsh chemicals such as bleach, acid-based products, ammoniac, lime scale removers, etc.

These products react with the panel ingredients creating white stains on them.

We do not recommend the use of any oily and harsh cleaning products..

**Packaging:**

Panels and accessories are supplied in non returnable cardboard boxes and treated wooden pallets (see pricelist for amounts of panels per box and pallet), Last holder becomes responsible for the packaging disposal as a last holder according to the article 18.1 at the regulations of Spanish Law

**Transportation:**

Goods are not dangerous for transportation by road, rail or sea

**Environmental information:**

Product does not constitute a hazard to human health (if not ingested) or to the environment. It's ecological and 75% is made of mineral quarries remains.

Storage Recommendations:

Panels must be kept in an indoor warehouse the same way they were shipped from the factory inside their boxes on a flat and horizontal surface. Store at a temperature between 5°C and 45°C

Handling Recommendations:

Product may generate dust so if needed during installation, use a suction machine, vacuum, dispose remain materials and rinse out the area after the installation.

Disposal Recommendations:

Try to minimize or avoid generation of wastage. Disposals should be done through specialized companies so all regulations requirements established for environmental protection by local authorities are fulfilled. Avoid disposal through drainage.
